

SANTIAGO ANDRES PINEDA

Software Developer | Frontend Developer | Full-Stack Developer

Palmira, Colombia | 3183847315 | santipinra@gmail.com

LinkedIn: www.linkedin.com/in/santiagopineda-dev | Portfolio: saintell.github.io/personal-portfolio/

PROFESSIONAL SUMMARY

Software Developer with 4+ years of experience building web and desktop applications, specialized in Frontend development with React, Angular, TypeScript and JavaScript, and Full Stack experience with Python/FastAPI, Django, .NET, Node.js and PHP/Laravel. Experienced across the full software development lifecycle, including requirements gathering, technical design, development, testing, deployment, maintenance and support. Skilled in REST APIs, authentication, WebSockets, automation/ETL, Docker, Git and SQL/NoSQL databases. Focused on clean code, performance, maintainability, user experience and production issue resolution.

TECHNICAL SKILLS

- Frontend: React.js, Angular 17/19/20, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Material UI, PrimeNG, Ant Design, responsive design, reusable components.
- Backend: Python, FastAPI, Django, Node.js, .NET APIs, PHP, Laravel, REST APIs, JWT/OAuth authentication, validations, web services.
- Databases and data: PostgreSQL, SQL Server, MySQL, MongoDB, SQL queries, Pandas, DBeaver, Studio 3T.
- Automation, AI and real-time systems: OpenAI API, Gemini API, WebSockets, audio processing, file automation, Watchdog, geocoding.
- Desktop applications and DevOps: Electron, PyQt5, Docker, Git, Git Flow, Azure DevOps Repo, deployment, monitoring and application support.
- Quality and delivery: Scrum, user stories, acceptance criteria, technical documentation, functional testing, corrective and evolutionary maintenance.

PROFESSIONAL EXPERIENCE

PCA Ingenieria - Software Developer | Nov. 2021 - May 2026 | Cali, Colombia

- Developed web and desktop applications with React, Angular, Python/FastAPI, Django and .NET, contributing to requirements gathering, development, testing, deployment and support.
- Built reusable, responsive and maintainable frontend interfaces focused on user experience, performance, accessibility and visual consistency.
- Integrated REST APIs, OpenAI API, real-time services with WebSockets and automation/ETL processes for traceability, monitoring and data processing.
- Performed corrective and evolutionary maintenance for existing solutions, diagnosing issues in servers, databases and production applications.
- Applied software development best practices, version control with Git, Docker containers, technical documentation and collaboration with multidisciplinary teams.

Key projects at PCA Ingenieria:

- Digital assistant with voice and avatar: frontend architecture in React, Python/FastAPI backend, OpenAI integration, WebSockets, audio handling, response synthesis and interactive avatar integration.
- Secure kiosk: PyQt5 desktop application with WebSocket and Python backend to restrict access to approved URLs and report activity in real time.
- Smart Energy: Python service using Watchdog to detect log changes, process events and feed a React reporting dashboard.
- ETL Tools: desktop application with React, Electron and Python scripts for ETL file upload/replacement, server status visualization and MongoDB monitoring.
- API MOR, Interactive Clients and Balanceados: enterprise modules with Angular, .NET and React for user management, role assignment, delivery status tracking, material inputs and product transformation.

Fundacion BioDess - IT Support / Junior Developer | 2020 - 2021 | Cali, Colombia

- Provided technical support to users and maintained equipment, websites and technology services to ensure operational continuity.
- Supported development, testing, documentation and maintenance tasks for internal solutions using Git, Postman, VS Code, PostgreSQL, MySQL and MongoDB.

FREELANCE EXPERIENCE AND PROJECTS

AvanzaEmpleo - Freelance Full Stack Developer | 2024 | Remote, Colombia

- Implemented backend requirements in Python and frontend features in React for a job platform with candidate, company, registration, authentication, profile and job posting modules.
- Developed and adjusted login, password recovery, user registration, form validation, confirmation messages and error handling features.
- Built improvements for candidate and company profiles, including image upload/display, editable forms, additional fields, dropdown lists, checkboxes and data updates.
- Implemented job search and job detail features, filters by company/city/category, job applications, favorites, application status and sorting by most recent date.
- Developed job posting administration features, including job creation/editing, active/suspended status, applicant count, field validation and UI/UX improvements.
- Performed UI corrections, copy updates, iconography adjustments, social media links, newsletter updates, resume download functionality and interface consistency improvements.

Logistics Automation System for Package Distribution - Freelance Software Developer | 2026 | Remote, Colombia

- Developed a desktop system to automate logistics batch processing from Excel files, reducing manual work in address normalization, geocoding and zone segmentation.
- Designed a modular architecture with user interface, Excel reader, AI-based normalization module, geocoding, business rules engine, cache and file exporter.
- Implemented the workflow for file upload, minimum column validation, address normalization, address-to-coordinate conversion and automatic Excel file generation by zone.
- Added caching mechanisms to reuse processed records, avoid reprocessing and improve consistency across batches.
- Applied technologies and concepts such as Python, desktop application development, Gemini API, geocoding API, SQLite, Excel automation, business rules, traceability and modular design.

EDUCATION

Universidad Santiago de Cali - Systems Engineering | 2024 - Present | Remote, Colombia

Universidad del Valle - Technology Degree in Information Systems | 2016 - 2021 | Palmira, Colombia

CERTIFICATIONS AND TRAINING

- Claude Code Course - Platzi (2026).
- Prompt Engineering Course - Platzi (2026).
- n8n Automation Course - Platzi (2025).
- AI Tools for Developers Course - Platzi (2025).
- Frontend Developer Course - Platzi (2025).
- REST API with JavaScript: Fundamentals Course - Platzi (2025).

LANGUAGES

- Spanish: Native.
- English: B1.
